

This is Atlas Copco in China

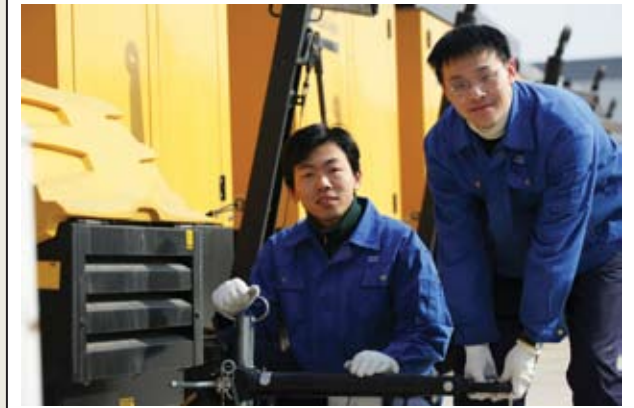

Sustainable Productivity

Compressor Technique

Atlas Copco Compressor Technique in China handles the manufacturing, sales, rental, service and marketing of a wide range of stationary air and gas compressors, portable compressors, generators and air treatment equipment. Several other Brands within the Compressor Technique business area are also represented in China.

Construction and Mining Technique

Atlas Copco Construction and Mining Technique develops, manufactures and services rock drilling tools, construction and demolition tools, drill rigs and equipment. It innovates for superior productivity in surface and underground rock excavation, exploration drilling, rock reinforcement, ground engineering, water well, oil and gas drilling, and compaction and paving equipment worldwide. Several other Brands within the Construction and Mining Technique business area are also represented in China.

Industrial Technique

Atlas Copco Industrial Technique in China handles sales, service and marketing of nearly 3,000 different kinds of tools, including air and electric hand-held tools, a wide range of accessories, fixtured nut runners, quality assurance of tightening systems, material removal tools and air motors etc.

We innovate for superior productivity for applications in the automotive, aerospace and general manufacturing industries. Several other Brands within Atlas Copco Industrial Technique business area are also represented in China.

We invest in R&D and Innovation

Atlas Copco is investing in state-of-the-art Research and Development Centers in Nanjing, Wuxi and Tianjin. The R&D centers will provide Atlas Copco's Compressor Technique and Construction and Mining Technique business areas with design and development in line with the needs of customers in the Chinese market. Industrial Technique business area has an Asian Application Center in China. The innovative R&D centers include specialist engineering services, laboratories and testing facilities. Several of our companies in China are classified as High Tech.

We invest in our People

The success of Atlas Copco depends on having competent and committed employees. Employees are able to develop their skills through ongoing, on-the-job training in the form of real responsibilities from day one. To ensure that employees continue to have the knowledge they need to perform their duties, ongoing training and development activities take place both within the Group and with external providers. Career opportunities are advertised on our Internal Job Market.

ACademy

The Atlas Copco China ACademy includes training in General Management, Leadership, Advanced Skills, Corporate Culture as well as specific business or product related training programs.

Corporate Responsibility

Atlas Copco is involved in various charity and community engagement projects, both on a Group-wide and on a local basis in China. In cooperation with local communities we add value through financial contributions and other resources. Two important examples in China are Water for All and the Atlas Copco Sunshine School.

Water for All

Atlas Copco employees run the organization Water for All on a voluntary basis with the purpose to facilitate access to safe drinking water where this is in short supply. In China, the goal is to improve the health and quality of life of 15,000 villagers in 10 communities in Ningxia province by increasing access to potable water, improving sanitation infrastructure, promoting health and hygiene practices. In China, 2,500 Atlas Copco employees contribute to Water for All with their donations being matched by Atlas Copco.

Atlas Copco Sunshine School

The school was built with help from donations made by Atlas Copco employees in Greater China, matched by Atlas Copco. The school is located in “Happiness Valley” in Sichuan province and has 400 students, from kindergarten up to 15/16 years.

Atlas Copco is an industrial group with world-leading positions in compressors, construction and mining equipment, power tools and assembly systems. The Group delivers sustainable solutions for increased customer productivity through innovative products and services. Founded 1873, the company is based in Stockholm, Sweden, and has a global reach spanning more than 170 countries. In 2010, Atlas Copco had about 33 000 employees and revenues of BSEK 70 (BEUR 7.3).
